The image contains pie charts illustrating weight changes in different categories:

- **Weight Loss** (≤2 kg)
- **Weight Stable** (-2 to +2 kg)
- **Mild-Medium Weight Gain** (3 to 8 kg)
- **Marked Weight Gain** (≥9 kg)

Each pie chart is divided into segments representing different conditions:

- **White** = Stable with no MS (D0-; D6-)
- **Light Gray** = Reversion to no MS (D0+; D6-)
- **Dark Gray** = Incident MS (D0-; D6+)
- **Black** = Continued MS (D0+; D6+)

The sizes of the segments reflect the proportion of each condition within the weight category.
