HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Figure 2: Within-group comparison.

The first 3 graphs show changes before after rTMS in each group. The graph number 4 shows the number of binge episodes in the last 15 days at initial visit minus the number of binge episodes in the last 15 days at final visit. Results are shown as a box-whisker plot, with median and 25th quartile
