

**A**

**Figure legend:** qPCR quantification of endogenous Fli1 mRNA and miR-145 in BJ-TERT cells and HUVEC. Values are presented as mean fold enrichment in BJ-hTERT cells compared to HUVEC. Expression levels were normalized against 18s RNA. Errorbars represent S.E.M. (n=2)

**B**

**Figure legend:** qPCR quantification of miR-145 levels in BJ-hTERT cells after transfection with miR-145 mimic and inhibitor, respectively. Values are presented as mean relative expression (log scale). Errorbars represent S.E.M. (n=3)
