

EXAMPLE AND DEFINITIONS

Example

In this example, we are asked to anticipate the risk of death from HCC during the coming year for a man, 20 years old, who was diagnosed with a compensated cirrhosis 1 year before... >>>>

If you don't know exactly the risk, you can give a range
Example:

Definitions :

First decompensation: means the first decompensation episode (ascites, digestive hemorrhage, encephalopathy, icterus)

Stable decompensated state: means the patient has a history of a first decompensation, but after the first one he doesn't do any other decompensation episode

Progressive decompensated state: means the patient has successive decompensation episodes

HCC: hepatocellular carcinoma
